Only elevate executables that are signed and validated	Disabled
Only elevate UIAccess applications that are installed in secure locations	Enabled
Run all administrators in Admin Approval mode	Enabled
Switch to the secure desktop when prompting for elevation	Enabled
Virtualize file and registry write failures to per-user locations	Enabled

Complete this lab as follows:

1. On CorpDC, access the **CorpNet.local** domain for Group Policy Management.
 - a. From Hyper-V Manager, select **CORPSERVER**.
 - b. Double-click **CorpDC**.
 - c. From Server Manager, select **Tools > Group Policy Management**.
 - d. Maximize the window for easy viewing.
 - e. Expand **Forest: CorpNet.local > Domains > CorpNet.local**.
 2. Configure the UAC settings.
 - a. Right-click **Default Domain Policy** and select **Edit**.
 - b. Maximize the window for easier viewing.
 - c. Under Computer Configuration, expand and select **Policies > Windows Settings > Security Settings > Local Policies > Security Options**.
 - d. From the right pane, double-click the *policy* you want to edit.
 - e. Select **Define this policy setting**.
 - f. Select **Enable** or **Disable** as necessary.
 - g. Edit the *value* for the policy as needed and then click **OK**.
 - h. Repeat steps 2d–2g for each policy setting.
