> ➕ Add Mark Woods
> ➕ Add Pat Benton
> ➖ Add Juan Suarez
> ➕ Add Arlene Kimbly
> ➕ Add Mark Burnes
> ➕ Add Shelly Emery

Explanation

Complete this lab as follows:

1. Access Active Directory Users and Computers on the CorpDC server.
   a. From Hyper-V Manager, select **CORPSERVER**.
   b. From the Virtual Machines pane, double-click **CorpDC**.
   c. From Server Manager's menu bar, select **Tools** > **Active Directory Users and Computers**.
   d. Maximize the window for better viewing.

2. In the Users container, create a group named **Managers**.
   a. From the left pane, expand and select **CorpNet.local** > **Users**.
   b. Right-click the **Users** container and select **New** > **Group**.

   > You can also create a new group by selecting the Create a new group in the current container icon found in the ribbon.

   c. In the *Group name* field, enter **Managers**.
      A pre-Windows 2000 group name is created automatically, but it can be changed.
   d. Under Group scope, make sure **Global** is selected.
   e. Under Group type, make sure **Security** is selected and select **OK**.

3. Add user accounts to the Managers group.
   a. From the left pane, ensure that the Users container is still selected.
   b. From the right pane, right-click **Managers** and select **Properties**.
   c. Select the **Members** tab.
   d. Select **Add**.
   e. In the *Enter the object names to select* field, enter all the ***usernames***. Use a semicolon to separate each name.
      Example: Steve Hoffer; Peter Williams; Princess Diana
   f. Select **Check Names**.
   g. Select **OK** to add the users and close the dialog.
   h. Select **OK** to close the Managers Properties dialog.

You can also add individual users to a group by right-clicking the user and selecting **Add to a group**.
